VIDEO OTOSCOPE

HEMANT'S MEDICAM®

An ISO 9001:2008 Company
An ISO 13485 : 2003 Company

ENT CARE PAR EXCELLENCE

When a patient approaches you with an ENT disorder, he expects a quick and exact diagnosis. MEDICAM helps you to give him that assurance. With our revolutionary **VIDEO OTOSCOPE**, an innovation that facilitates thorough investigation, in-depth analysis and efficient management of the patient's condition.

This video otoscope camera comes with 2.4 inch screen. This unit has a image freezing and saving facility.

It also has video recording function. The data gets stored in memory card which can be downloaded on any computer.

The probe is fully waterproof. The size of the probe camera is only 3.9 mm which comes wih LED illumination.

It is a very good portable device with very good user friendly features.

THE INNOVATORS. YOUR THIRD EYE.

MEDICAM is a name thousands of doctors rely on. Since its inception in 2001, the company has positioned itself as a reliable partner of medical practitioners. Today, the company provides surgeons with cutting-edge optical solutions like Intro Oral Camera (Dental), OPD ENT Camera (ENT), USB Video Dermatoscope (Dermatology), Video Laryngoscope (Anesthesia) and Protocam. Thus helping them to look deep inside one's body and diagnose the exact problem.

An ISO 9001:2008 and ISO 13485:2003 company, MEDICAM's state-of-the-art technology delivers the newest and the most advanced cameras to the industry. The CE marking assures that none of our products compromise on safety, explains why medical practitioners trust in MEDICAM and prefer to partner with us.

Image Sensor	CMOS Image Sensor 320(H) X 240(V)
